

Pounds with Principles

Faith groups investing in 'good'

Our money has great power. Our choice of bank account, pension, savings and investments all have an **impact** on our communities and the world.

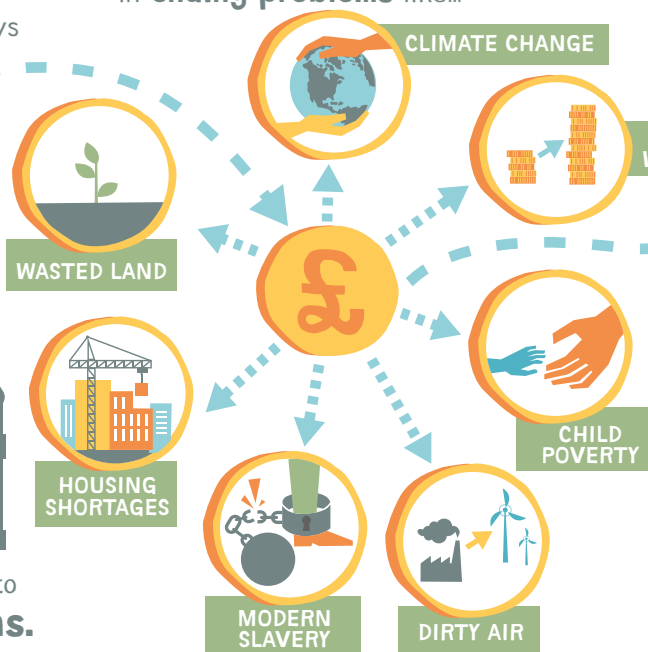

Faith organisations often look after large amounts of money that can be **invested** in ways that **achieve more** for communities...

Together we can invest in ending problems like...

And some can be **invested** in local projects today for people young and old to take part in.

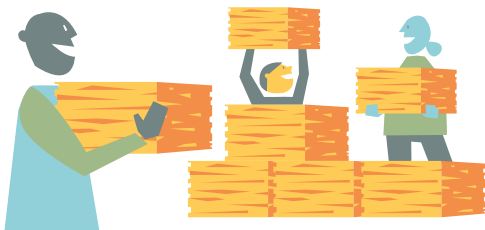

...as well as **create an income** to fund long term missions.

Either way, we can make our money work harder to create futures that are safe, clean and stable for the people we care about.

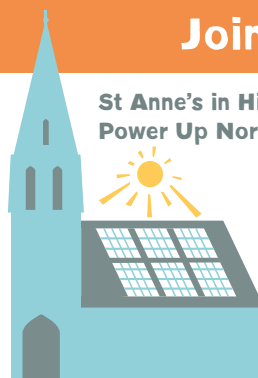

There are lots of projects happening all over the country

Holy Trinity Tulse Hill's straw bale community centre

St Anne's in Highgate Power Up North London

St John's Centre at St John the Evangelist, in Old Trafford

DISCUSSION POINTS

for parochial church councils and other faith investors

1.

Where are our funds currently invested?

2.

Is there a local need or project we could work with or start up?

3.

Could we invest some of our reserves in ethical funds to do good while making additional income?
